

An Equilateral Triangle

All three sides of an equilateral triangle are the same length.

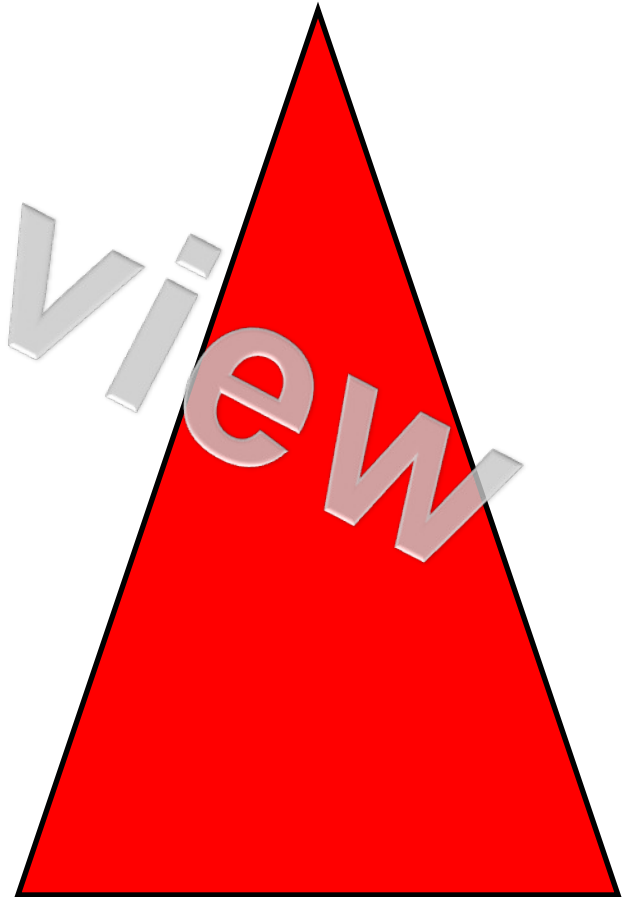

All three angles are the same (60°).

An Isosceles Triangle

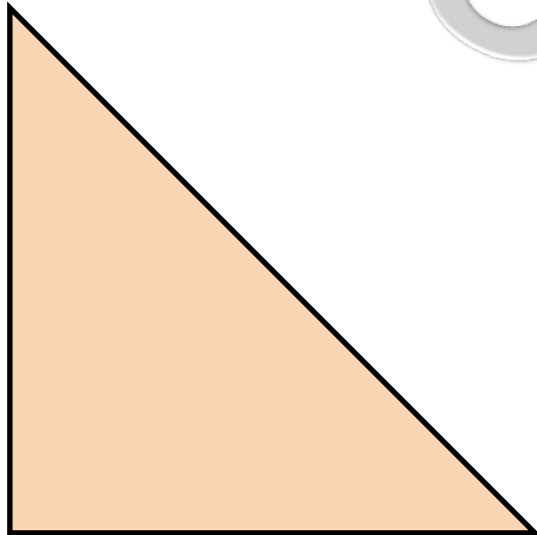

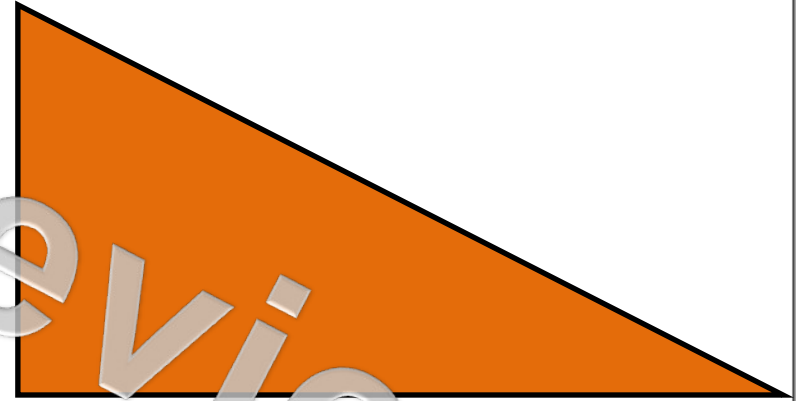

Two sides of an isosceles triangle are the same length.

Two of the angles are exactly the same.

A Right Angled Triangle

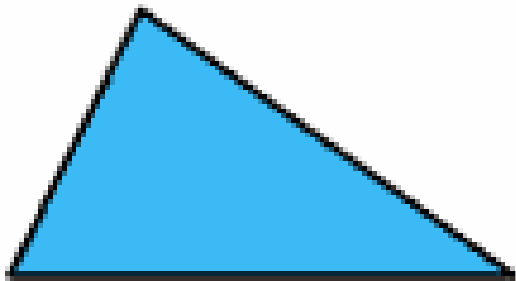

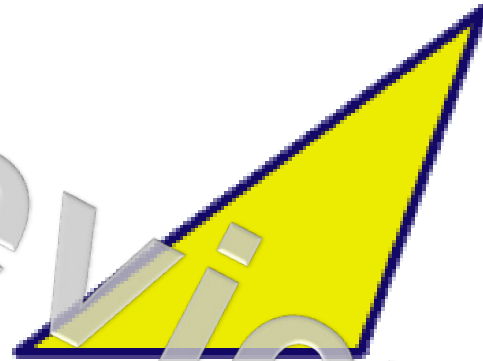

A right angled triangle has one right angle.

A right angled triangle can also be an isosceles triangle.

A Scalene Triangle

All three sides of a scalene triangle are a different length.

A scalene triangle has no equal angles.
