

Why Do We Have
Day and Night?

For Preview
Only

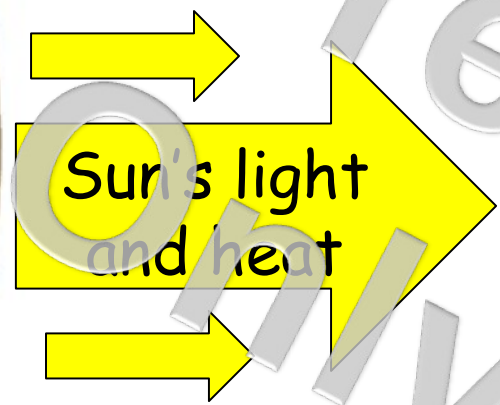

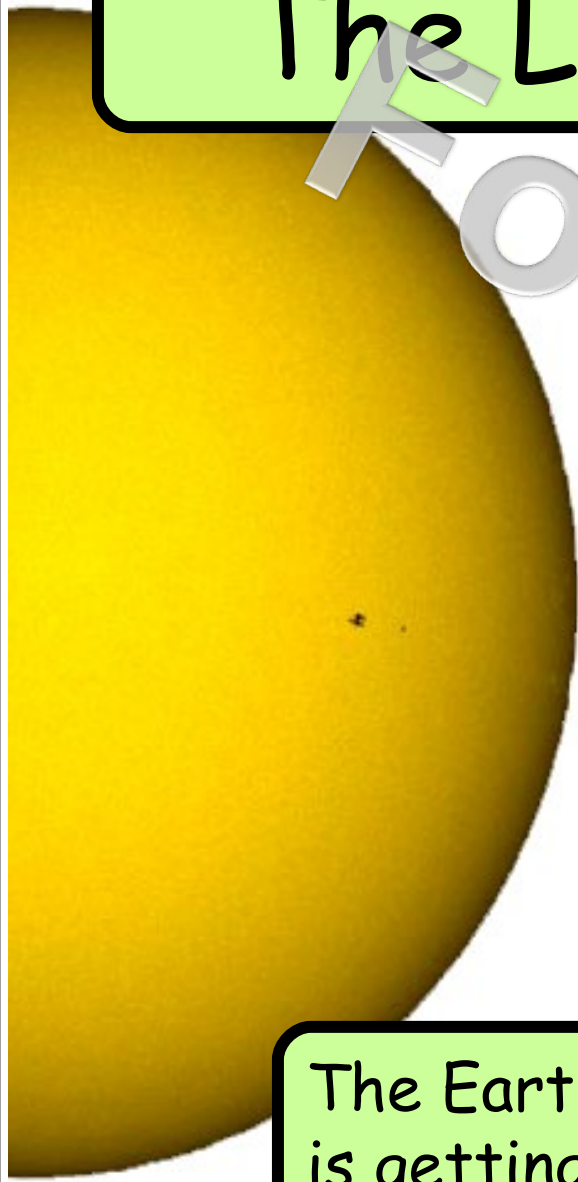

The Spinning Earth

The Earth spins on its axis. It spins once every day (24 hours).

The Light from the Sun

The Earth is spinning around. Some of the Earth is getting sunlight. The rest is in the dark.

Day and Night

At the moment, the sunlight is not shining on this half of the planet. It is night time.

Sun's light
and heat

At the moment, the sunlight is shining on this half of the planet. It is daytime.
